MEMORANDUM TO:

THRU :

1. We are experiencing an increasing number of problems of a psychiatric and medical nature. This often means that members of my medical staff and I need to discuss certain cases by cable; and in many cases the preliminary discussions are of a sensitive nature that must be protected by not letting anyone else know.

25X1A

2. As it now stands, none of the doctors have [redacted] cable releasing authority and must show such sensitive material to lay persons before sending it.

3. I am requesting your consideration to grant all project doctors this type of clearance authority to be used only in cases of such sensitive nature. This is to be construed that if the problem affects commanders or organizations, the matter will be brought to attention of such authorities when the case is clear enough to present the case with proper recommendations.
